

ABODE PROPRTY MANAGEMENT.

A Testimonial, by Barry & Ellen Goodman.

Once in a while people get lucky for no apparent reason. On one such occasion, just after we bought our house in Kyrenia, a colleague of mine in the UK asked me who was going to look after it for us. At that time we had no idea and so accepted his advice to ring Debbie on such and such a number. I actually made the call only to be told that they were Estate Agents but next door was a Property Management Company. They gave me the number and said to ask for Sandra. The rest as they say is history.

Sandra is one of those people, who after a very short time, you feel you have known for years. We have known Abode now for about three years but strangely we don't think of it as Abode, we think of it as Sandra and Hakkan, ably backed up by Lorraine who instills the same confidence in you if Sandra or Hakkan are not around.

They look after all our needs regarding the house and pool and everything is done as YOU the client wish. It is almost like they can read your mind, know what you expect and then deal with it.

When we arrive at our house in Kyrenia, it is immaculate, as are the pool and patio areas. It does go beyond just doing what we pay them to do though. Things are put away securely that we have left out by mistake. Things which have gone wrong outside their jurisdiction have either been dealt with or we have received a phone call advising us of the problem.

Sandra was instrumental in the furnishing of our house, inside and out, and she is very adept at identifying a person's taste and translating it into products that you would choose yourself and at a price within your budget. This is all done with minimal fuss and because of her enthusiastic personality she seems to be able to get the locals, who can be a bit laid back, to deliver on time.

There is an abundance of companies not only in North Cyprus but throughout the world who tell you how good their service is. This one delivers that promise, so, don't take our word for it..... try it yourself.
